## "Figure it out for yourself"

You carry Fire Insurance—and why? Because of the danger of sudden loss. Because it protects you against this uncertainty, although your buildings may never burn down. Do you protect them against decay—against the weather—against the dead certainty of depreciation resulting from allowing them to go unpainted. Why not? Paint Insurance is worth even more to you than Fire Insurance—yet is often sadly neglected—and you are the loser. MASTIC PAINT for 40 years has proven the "real protector" of buildings. For quality—service—economy—and beauty of finish it has no equal. Ask for color card.

### Will Turn Off Gas

The occasion of the turning off of gas tomorrow afternoon is some emergency work on the Maysville county branch line just this side of the measuring station. Mr. A. L. Glascock is making a pond on his place at this point, in accordance with understanding at the time the line was laid. The first excavation has exposed the gas line and the work tomorrow afternoon consists in putting the pipeline back in the ground with the usual covering of dirt. The trench has been dug, material assembled and everything in readiness for the work that has to be done while the gas is off. The Gas Company says it will take about two hours to put the line lower into trench, insert a piece of pipe and cover up, and turn on the gas again.

### LOVE LAUGHS

**At Blacksmiths, and How the Fair Plaintiff Sometimes Has a Change of Heart**

The "Vice vs. Mulligan" seduction case which has been before the Maysville courts for the past two years, and which has caused several ripples on the fair bosom of public opinion, yesterday came to a sudden and unexpected termination and was settled p. d. q. by a jury which heard the fair plaintiff, 19-year-old Mattie Vice, who charged Thomas Mulligan with seduction and the parentage of her child in two former trials, turns right around and reverses her testimony, declaring that she was influenced to testify against the defendant in the former trials and that Mister Mulligan was her friend and benefactor instead of the debauchee she had repeatedly said he was.

Miss Vice was employed in Mulligan's restaurant where the cause originated and some pretty savory testimony was introduced, both pro and con. There were many who sided with the girl, who is quite good looking and very youthful in appearance; others said that Mr. Mulligan was the victim of a frame-up, and there you are; and all is well that eventuates the same way.

However it ends some-boddy a bit of money.

Do you see how the square cross-roads at top of head and foot beautify this bed? Imagine this design with round tubing in those positions. Would not the result be "ordinary" and monotonous?

It is just such details of clever and artistic designing that have made our steel beds so popular. And the very large corner posts with brass caps all combine to make this an unusually artistic bed.

Moreover this bed is as good as it looks. Because it is made of drawn steel tubing, very light in weight—extremely strong.

A child can move this bed with the greatest ease. Come in and see this bed. Then you will realize how good it is.
